

Al
concl.

the reference relationship is changed so that the first part refers to another part. --

Please add the following new claims:

-- 5 The three-dimensional CAD system according to claim 2, wherein:
the first part has a relationship to refer to the second part and, when
only the first part of these parts is integrated;

data that the identification ID of the second part is unnecessary is
stored, and the identification IDs of both of the parts are changed;

the identification ID of the second part is deleted according to the stored
data; and

the reference relationship is changed so that the first part refers to
another part. --

-- 6 The three-dimensional CAD system according to claim 3, wherein:
the first part has a relationship to refer to the second part and, when
only the first part of these parts is integrated;

data that the identification ID of the second part is unnecessary is
stored, and the identification IDs of both of the parts are changed;

the identification ID of the second part is deleted according to the stored
data; and

the reference relationship is changed so that the first part refers to
another part. --
